Abstract (en)

[origin: EP1736607A1] A system for insulating, ventilating and lightening a building structure comprises a modular element having a longitudinal axis and a cross axis, a substantially C-shaped section with an upper wall and two longitudinal solid sidewalls, as well as means for being engaged with modular elements, arranged at least along the longitudinal walls of the modular elements; the system further comprises a tube crop end, a support element on the ground having means for housing an end of the tube crop end and a capital element for supporting the modular elements.
