Abstract (en)
The escapement has a mobile escapement part including a pinion in gear with a seconds wheel and a wheel (24b), and a unit for transmitting an energy from the wheel (24b) to a resonator. The transmission unit includes a body (26c) and spring plates (26a, 26b) that are integrated to the body through one of their ends and equipped with pallets at their ends. Teeth of the wheel (24b) form a succession of support points arranged for cooperating successively with pallets (32) for transmitting gear-train energy to the resonator. An independent claim is also included for a mechanical oscillator including a resonator and an escapement.
