Abstract (en)

[origin: WO2005094574A1] The invention relates to a method for combating a stem plant, in which method a cold medium is supplied directly to the root portion of the plant . The cold medium is preferably a liquefied gas, for instance N2 or CO2, which is supplied to or in the vicinity of the growth centres of the plant. It will be noted that the plant withers after a period of time.
