Abstract (en)

[origin: WO2005100089A1] The invention relates exterior rearview mirrors, wherein lighting units (8) in the form of a repeating direction indicator lamp are housed in the mirror head (1). In order for the diffuser panel (14) to be substantially invisible when not illuminated, the diffuser panel is configured on its exterior in such a manner that it is invisible from the exterior when not illuminated, while the light beams emitted by the illumination means (25) have sufficient luminous intensity after passage through the diffuser panel (14). The exterior rearview mirror is especially suitable for motor vehicles.
