Abstract (en)

[origin: WO2005100668A1] In a sheet with openings (16) which is designed to receive a printed pattern on one of its surfaces (18, 20), a fabric (10) woven from crossed threads (12, 14), more particularly synthetic filaments, has different colouring on each surface (18, 20), with the printed pattern on the lighter surface (20). More particularly the woven fabric is a monofilament or multifilament synthetic woven fabric (10) which either is made of black threads (12, 14) or is dyed black and is coloured white (24) on one surface (20). The threads are crimped at the same level and the lighter surface (20) has a high degree of whiteness.
