Abstract (en)

[origin: WO2005106177A2] The invention relates to a connector (1) which is designed to connect two hollow section ends. The inventive connector comprises a body (10) having two opposing faces (11, 12) and two lateral walls (13, 14). The invention is characterised in that the connector comprises gas-proofing means (15) which are fixed solidly on one of the faces (11) of the body (10) and which are adapted to be compressed.
