Abstract (en)

[origin: WO2005100729A1] The invention relates to a protective wall, in particular, a high water protective wall, with posts (10), inserted in fixed housings, comprising grooves running in the plane of the protective wall and with board elements (12) which may be introduced into the grooves between the posts (10). According to the invention, the posts (10) are stored horizontally in a trough (11) with a U-shaped cross-section sunk into the ground and may be pivoted into a vertical position. Several board elements (12) are arranged in the same trough (11) which may be connected together to give an essentially sealed wall.
