Abstract (en)  
[origin: WO2005086592A2] The present invention relates to an apparatus and system permitting simulated firing from any hand held firearm. In particular, the present invention relates to a light emitting ammunition to be used as part of a system for registering "hits" during dry-fire exercises and gaming with any hand-held firearm. Without any change to either the feel, or the external dimensions of the gun including a power source, an illuminator electrically attached to said power source, and an actuator electrically attached to said illuminator for readily controlling illumination of said illuminator.
