Abstract (en)
[origin: EP1738666A1] The invention relates to satisfying the life necessity of a human being, in particular to jewellery pieces and other ornaments which are carried on a body and fixed by piercing. The inventive jewellery piece comprises an ornate element, a piercing pin provided with an end-head and a hinged joint for connecting the pin to the ornate element and male and female links, wherein the male link is mounted on the ornate element, the female link is mounted on the piercing pin and is embodied on the section mating therewith in such a way that the external surface thereof is convex and has a curved external shape whose size is greater than the size of the cross section of the piercing pin. Said invention increases the safety of use of jewellery pieces.
