Abstract (en)
The support has a terminal flap (5) articulated on an intermediate flap (4) that is articulated on a flap (3) formed of a flexible and deformable cushion. The flaps (4, 5) have a plywood plate made of a rigid or semi-rigid light material in the interior. The flaps are set in a coplanar position while resting on the ground for utilization as a mattress and are folded in a neighboring and parallel plane. The flap (3) covers and overlaps the flaps (4, 5) that are in contact with each other. A large pocket (9) is provided at a recto of the flap (5). An independent claim is also included for a beach mattress having intermediate and terminal flaps.
