Abstract (en)

[origin: EP1738904A2] The coupling arrangement (10) includes a coupling (13) for connecting or disconnecting a drive wheel (19) with respect to an axle portion (11), and a coupling ring (16) that can be set in first and second axial position for axially adjusting the coupling with respect to the axle portion. The coupling ring can be moved between first and second axial position by pneumatic or hydraulic operation using a pneumatic or hydraulic medium. The axle portion has a rotating shaft (25) and a bore (26) to guide the movement of the coupling ring through a sealed passage into the axle portion.
