Abstract (en)  
[origin: EP1738947A2] The present invention relates to a hybrid vehicle (100) comprising an engine (220), a generator (210) for generating electric power using power of the engine, a battery (300) for storing the electric power generated by the generator, a motor (240) for generating power using electric power from at least one of the generator and the battery to drive a drive wheel (102), an external output terminal (500) to which an external device (150) is connectable, and a controller (400) configured to adjust the electric power from at least one of the generator and the battery and to output the electric power to the external output terminal as supply electric power for the external device.
