Abstract (en)

The invention relates to a filling machine (1) for the filling of an amount of edible ice into a container (2). The machine comprises: space for containing said edible ice, filling unit (6), which contains a piston (4) and a volume (13) with at least one inlet (11) and at least one outlet (14), where these create connections respectively to said space and container for the filling unit, and at least one valve. The said least one valve is an integrated part of said filling unit (6). The invention also relates to a method for the filling of an amount of edible ice into a container (2) with a filling machine (1), and the use hereof.
