Abstract (en)
[origin: EP1739041A2] The roller magazine has storage locations provided with holders for holding a material web (2), and trolleys that move on rails for rolling and transporting the material web. The material web is arranged and stored at a storage location and held on the trolley with the use of a tilting lever (7) and a height adjustable stand (14). A hydraulic or pneumatic cylinder, connected with a compression spring, is provided for controlled lifting and movement of the material web from the height adjustable stand at a storage location.
