Abstract (en)
[origin: EP1739228A1] The machine has a press section, where a fibrous material sheet (1) is guided in the section with press rollers (5, 14) by a central roller (8) forming press nips (9, 12). The sheet is passed together with a transfer tape (10) by the nips formed between the central and press rollers. Line forces, which are produced by the press roller (5) and the press nip (9) that forms the central roller, amount to maximum 30 kilo Newton / meter.
