Abstract (en)  
[origin: EP1739508A1] The time piece has a timepiece movement and a Chinese calendar display including lunar date and month indicators (12, 14). A date runner (50) has a date wheel (51) moved forward one step at each day and a drive finger (52) to move a month star wheel (60) forward to one step at the end of each revolution of the runner. A lunar month length selector (27) defines two stop positions for a month of thirty days and twenty-nine days, respectively. A bissextile month selector has a finger to move back the star wheel to one step when the month selector passes from normal to a bissextile position.
