Abstract (en)  
[origin: WO2005092132A1] The aim of the invention is to create a fabric for protective clothing that provides protection especially from liquid aluminum splashes while being very comfortable to wear and being usable in an industrial washing and drying process. Said aim is achieved by supplying the fiber components wool (fiber component A), thermoplastic fibers, particularly polyamide and/or polyester fibers (fiber component B), and modacryl (fiber component C), the ratio of each individual fiber component ranging between 5 and 55 percent by weight.
