Abstract (en)

[origin: WO2005100533A1] The invention relates to a method for producing quaternary hydroxyalkylammonium granules, which is characterized by spraying an aqueous solution or suspension comprising a) a quaternary hydroxyalkylammonium compound, b) a support material and c) optionally binders and/or other additives into a fluid bed installation. The fluid bed consists of granules that have the same composition as the aqueous solution or suspension sprayed into the installation.
