Abstract (en)
[origin: WO2005093185A1] A set of panels forms a modular building system, the set comprising a wall unit, a window unit, and a door unit. Each panel comprises a wooden framework with a skin on at least one side. A wall unit, a window unit with a wide window, a window unit with a narrow window, and a plain wall unit, are all of the same width, plus a plain wall unit of smaller width. The panels may be assembled from sub-panels. The panels are combined to form a building, preferably multi-storey, comprising a plurality of units, and the buildings can be combined to form a development.
