Abstract (en)  
[origin: FR2867515A1] The device has a shim to adjust the distance between an internal combustion engine block (100) and a support (41), to adjust the position of a transmission device, and to regulate oil clearance of the transmission device. A control device (12) has an actuating cylinder (8) with a cylinder piston rod (13) having a spherical section. A ball and socket joint is provided between a control rod (7) and the engine block.
