Abstract (en)

[origin: WO2005106324A1] The invention relates to a device for fastening an electrical installation unit, particularly a lamp, light, fire alarm unit, motion sensor unit, surveillance camera, sensor unit or a control unit such as a thermostat unit, to a ceiling or wall of a building or in the area around a building. The device comprises: a holding device (1), which is assigned or can be assigned to the ceiling or wall and which has at least one first connecting part element (37), and; a mechanical connecting device (3), which is assigned or can be assigned to the installation unit and which has at least one second connection part element (73). The at least one first connecting part element and the at least one second connecting part elements (37, 73) can be or are brought in contact with one another in order to fasten the installation unit to one another.
