Abstract (en)

The invention relates to the jewellery and fancy industry, in particular to the structural design of a jewellery piece such as a ring, brooch, bracelet, etc. provided with a removable fancy element, in the preferred embodiment, at least with two interchangeable fancy elements. The inventive jewellery piece is provided with a shaped through hole in the base thereof for passing therethrough a stem corresponding to the hole shape and comprising a loop of the fancy element pivotally connected thereto. A fixing unit is provided with a blocking element. Said invention makes it possible to substantially extend the assortment of such products and to improve the operating properties, including the fastening security of the removable fancy element.
