Abstract (en)

The apparatus has a workpiece opening (22, 28) for a workpiece (8). The workpiece and the workpiece opening have a driver (60) providing a shiftable reciprocating motion (86) with a reciprocating unit (96). A balance unit (94) is provided which is propelled in opposite directions for the reciprocating movement of the reciprocating unit. The reciprocating unit reciprocates along a first axis (24) and the balance unit moves along a second axis being parallel to the first. The axes are coaxial to each other.
