Abstract (en)

[origin: EP1741517A1] The device has a linking up mechanism (2) having a suction connection (3) equipped base plate (4) for the production of a perforated plate (5) and provided by negative pressure. Several bars (8) are inserted into the base plate with an inserting plate (6) having several recesses (33), which are connected to the base plate and partially with the suction connection. An independent claim is included for a method for machining the sheet.
