Abstract (en)
[origin: EP1741611A2] The coupling device (1) has a carrier device, an interface unit (2) with connecting elements and a protective cap (4) for an access point (2.1) connected to an operating device (6) with an operating element (6.1). The turning axis of the operating element is arranged so that the turning motion of the protective cap has a component perpendicular to the contact surface (2.3) between the protective cap and the interface unit.
