Abstract (en)
[origin: EP1741775A1] Core shell polymer particles comprising a benefit agent, preferably a sugar polyester are delivered to fabric during laundering and give long lasting adherence of the benefit agent to fabric during laundering. The core comprises a benefit agent and a polymer and is prepared using miniemulsion polymerisation. A method of depositing a benefit agent, preferably a sugar polyester, onto a substrate by means of such a composition is also disclosed, as are corresponding uses.
