Abstract (en)  
[origin: EP1741840A2] A support arrangement for use with a foundation raft formed of a settable material, the support arrangement comprising: a base member (12); a support member (11) arranged at substantially 90° with respect to the base member (12) such that, in use, the support member (11) is adjacent the foundation raft; and a cavity forming member which, together with the base and support members (11,12), forms a cavity (21) into which a settable material can be placed in use; and a plurality of support ties connected to the base member (12) and extending from one side of the support member to the other side of the support member for, in use, engagement with the foundation raft.
