Abstract (en)
[origin: EP1741854A1] The device has support consoles each comprising an upper shoe and connected on a wall (12) of a basin of a swimming pool by the shoe situated above water surface. A protection panel (36) is connected on the consoles by a fixation flange (50). The panel comprises safety and finishing sides (S1, S2), where the side (S1) is larger and inclined between the water surface and the wall. A trap (30) is provided to mask a floating drape and prevents access from above, where the drape is wound around a shaft (28).
