Abstract (en)

[origin: WO2005120842A1] The invention relates to a device for printing information on a compact disc surface comprising at least one movable print-head, a holding carriage (C), at least one main drive motor (M I), one additional motor (M II) for driving carriage (C) along one part of the displacement thereof, a mechanical switch (A) for alternately switching the carriage drive by the main motor (M I) and by the additional motor (M II). Said invention can be used for simple compact disc ink-jet printers.
