Abstract (en)

[origin: WO2005109429A1] A method and apparatus for synchronizing metadata of different assets referencing the same contents, using a backward-link information file of an asset when metadata of the asset is edited, the method including: editing a metadata of a first asset; detecting a second asset referencing the same content as the first asset using a backward-link information file of content which the first asset refers to; and synchronizing metadata of the second asset with the edited metadata of the first asset. Therefore, it is possible to easily synchronize metadata of assets in a plurality of MPV files referencing the same content.
