Abstract (en)
The machine has an operating device with an opening lever (9) coupled to a machine support arm (5). The opening lever has a free end coupled to an elevator line (7) which is connected to one end of the machine support arm and to one end of a movable supporting arm (3). The opening lever can swing between lower position and upper position for opening multi-armed support frame (2) with respect to a central stand pipe (1). The support frame includes the machine support arm and movable supporting arm, in which movable support arm and elevator line are coupled to upper end section of the section.
