Abstract (en)

[origin: EP1744001A1] Method involves selecting of a profile as wing profile (1) from a stockpile of glazing-bead profiles (10) of different depths and manufacturing of glazing-bead frames from it. Wing profile is mounted on the connection profile (8,9) which is necessary for the adjustment of the depth of the finished wing, provided with the glazing-bead frames, on the depth of respective window frame (15). An independent claim is included for an assembly kit.
