Abstract (en)
[origin: EP1744002A2] The unit has profile units (13) arranged at outer peripheries (3, 7) of panes (2, 6) of a surfaces unit (12), where the panes are spaced from each other by a separator (10). The separator is connected with a surface of the units by a layer (15) of adhesive agent, which is an adhesive (14) that is selected from a group having silicon, polyurethane, polymer and hybrid adhesive, below formation of edge connection in a force-fit manner. An independent claim is also included for a method of manufacturing a glass unit.
