Abstract (en)
[origin: US7552496B2] Disclosed is a body care brush comprising a brush holder (2-5) and a brush (1) that is rotatably mounted on said brush holder (2-5). The brush holder (2-5) is provided with a drive unit in which an electric motor (7) that is used for driving the brush (1) is mounted so as to be protected from the water. The brush (1) is hollow, is open at the bottom, and can be pulled over the drive unit so as to be driven by the electric motor (7) via an entraining element. The inventive body care brush provides relaxation and is comfortable and enjoyable to use, without going into contortions and applying any force.
