Abstract (en)
[origin: WO2005106063A1] The invention relates to a method for a treating a metallic surface (10), in particular a steel spring wire, for the production of pressure spiral springs. The metallic surface (10) is subjected to a nitration process or to a nitrocarburisation process. All areas (14) of the metallic surface, which are not nitrated or nitrocarburized, are subjected to a cold forming process prior to the nitration or nitrocarburisation process.
