Abstract (en)
[origin: WO2005095696A1] The present invention relates to a strengthening material suitable for use as reinforcement in composites, comprising at least one singular thickness-providing layer in the form of a knit of glass fibre and at least one monofilament, and at least one singular strengthening layer connected to the singular thickness-providing layer. In addition, the present invention relates to strengthening laminates comprising these strengthening materials and to composites comprising these strengthening materials and/or strengthening laminates.
