Abstract (en)

[origin: WO2005076900A2] Abstract An method for mapping data between a first document having a first structure and an intermediate structure, includes associating metadata in an intermediate structure to fields of a form via intermediate links based on at least one of a logical map of the intermediate structure and input from a user, associating data in the first document to fields of a form via first links based on at least one of a logical map of the first structure and input from a user, and displaying the form to the user.
