Abstract (en)

[origin: FR2864856A1] The system has a module (1) for reception and pre-decoding of initial short texts, and a module (20) for pre-processing the short texts. An extraction module extracts the information carried by the short texts. A processing module processes the information and narrowcasting of search results of relations between the informations or comparisons established between them. An independent claim is also included for a process of automatic extraction and processing of short text information.
