Abstract (en)

[origin: EP1745896A1] Cam plates can be substituted by crown gears (10.5) and slide rails for any crank and by any toothed rack (10.6) that is aligned in a sliding direction and interlocks with any assigned crown gear. A conveying device slides so as to adjust its clearance from a pair cutting knives at the front in the same way as with a mechanism working with a cam plate.
