Abstract (en)

A device for scraping rollers in paper, cardboard or tissue machines, with a holder for a movable scraper blade mounted on the holder in the cross-machine direction (CMD) and contact applicator(s) to press the blade against the roller, in which the holder has two elements capable of relative motion in the CMD, the blade being fixed to one of these and the contactors being fixed to the other in such a way that when the blade moves in the CMD the other element moves relative to the contactors in the CMD.
