Abstract (en)

[origin: EP1746218A1] The panel has a nut (11) including an upper lip (8) and a lower lip (13) that laterally protrudes over the upper lip. An end of a bulge lies in a horizontal level as a spring point (7). The bulge crosses over a projection (5), which is triangular in shape in cross section and projects downwards. A recess (12) corresponding to the projection is provided in the lower lip in an area that projects over the upper lip.
