Abstract (en)
[origin: EP1746234A2] A support bracket for sliding and folding door panels has the weight of the panels carried by one or more brackets (16) edge mounted to the panels and connected to a slider (17) via a swivel pin (18). The edge mounting ensures that the weight of the panels is carried directly to the sliders and the brackets are hidden when the panels are closed. The pins can be cylindrical or conical and the panel is supported by sliders moving in top and bottom guides (6).
