Abstract (en)
[origin: WO2005115275A1] An endoluminal device (170) comprises a stent and a tubular graft supported by the stent. The graft has a proximal (174) and a distal opening (176) and comprises a synthetic material and a bioremodelable material. The bioremodelable material is disposed on an exterior surface in at least one band (171) adjacent at least one of the proximal and distal openings.
