Abstract (en)
[origin: WO2005113347A1] The invention relates to a container (1) for holding foodstuff, comprising at least one paper layer (3) and a container wall (4) having an additional layer (4). Said container (5), on its upper end (6), has a container opening (7) and is closed on its lower end opposite said container opening. At least the container wall is formed from a two-dimensional cut (9) that is joined to form a continuous container wall. At least one inspection window (10) is configured in the container wall and is obturated by a transparent or translucent window film (11). The container wall is at least partially curved in the area of the inspection window (10) and the window film for sealing the inspection window is hot-sealed with the paper layer (3).
