Abstract (en)

[origin: WO2005111121A2] The object of the invention is to provide a method for producing shaped bodies made from crosslinked gelatine that can be used as substrates for tissue implants and have individually adjustable decomposition periods. The method comprises the following steps: (a) preparation of an aqueous gelatine solution; (b) partial crosslinking of the dissolved gelatine; (c) production of a shaped body using the gelatine solution containing the partially crosslinked gelatine; and (d) crosslinking the gelatine contained in the shaped body.
