Abstract (en)  
The device (1) is made of an elastic material and has a geometrical shape such as a globe (2), or a cube. The lower surface (12) is plane, facilitating a standing position. A short cylindrical and threaded extension (13) can be used as a ventilation opening (18) and for filling with a saline solution or any other effective fluid. A tube (8) exceeds in an acute angle from the container (2) at the opposite side. The tube (8) is wider at its lower end and fitted with a sphere (24) with a hole (26) at the top to be inserted into a nostril.
