Abstract (en)  
The tool holder has at least one radially movable locking body (3) and a radial locking arrangement (5,6) with a locking surface (4) radially facing the locking body. The locking arrangement is formed to be at least partly radially damping at least on the locking surface. The locking surface consist of a material with a maximum of the imaginary component of the complex modulus of elasticity in the temperature range between 0 and 100 degrees C and in the frequency range between 1 and 100 Hz.
