Abstract (en)

IR-sensitive imageable element comprising: (a) a substrate with a hydrophilic surface, b) a bottom layer, comprising at least one photothermal conversion material and at least one polymer A soluble or swellable in an aqueous alkaline developer and insoluble in organic solvents with low polarity, (c) a top layer, comprising at least one polysiloxane selected from arylpolysiloxanes and arylalkylpolysiloxanes having a glass transition temperature T_g of more than 60 °C and a hydroxyl content of at least 1 % by weight.
