Abstract (en)
[origin: EP1748124A2] The grouting device (1) comprises a device (2) for applying the grouting or pointing material combined with a device (4) for applying the separating agent. It can also incorporate a device (17) for stripping or pointing the joint. The two or where applicable three devices are arranged in series. The devices for applying the grouting and separating agent have nozzles whilst the device for stripping the freshly grouted joint consists of soft plastics to adapt to the shape of the joint. The device has a guide wheel (19) for running along the joint.
