Abstract (en)

The unit has a spring (3) and a groove (4) that are arranged at the front sides of the unit such that the spring (3) engages in the groove (4). Another spring (6) is arranged at a base surface of the groove (4). Another groove (7) is arranged at the front side of the spring (3) such that the spring (6) engages in the groove (7). The cross section of the grooves and the springs are tapered in a wedge-shaped manner with respect to the base surface. An independent claim is also included for a fire protection gate or fire protection door comprising a door leaf unit.
